

***Twenty-Fourth Annual  
University of North Georgia  
Mathematics Tournament  
April 7, 2018***

***Morning Component***

***Good morning!***

***Please do NOT open this booklet until given the signal to begin.***

***There are 40 multiple choice questions. Answer the questions on the electronic grading form by giving the best answer to each question.***

***The scoring will be done by giving one point for each question answered correctly and zero points for each question answered incorrectly or left blank. Thus, it is to your advantage to answer as many questions as possible, even if you have to guess. If there is a tie, question number 8 will be used again as a tie-breaker.***

***This test was designed to be a CHALLENGE. It is difficult, and you may not have time to complete all questions. Do not worry if you are unable to answer several of the questions. Instead, we hope that you will obtain satisfaction from those questions which you ARE able to answer.***

***You may write in the test booklet. You may keep your test booklet and any of your scrap papers. Only the electronic grading form will be collected and graded.***

***Good luck!***

***Do Not Open Until Signaled.***
